

CAREER TALK AT UNIVERSITY MALAYA

- submitted by Student Activities Chair

A career talk was organized by the ASHRAE University Malaya Student Branch on the 20th February 2008. Three speakers from Mayair were invited to share their future career path with students in the event held at the Engineering Faculty of University Malaya.

The director of Mayair, Ir. Den Low introduced the profile and activities of the company to the participants. He enlightened the participants on job opportunities in joining the HVAC field as the industry offer various employment in Malaysia and other countries. The human resource manager then explained the various positions in Mayair and the respective job functions of a Design Engineer, Project Engineer, Production Engineer, Product Development Engineer, and Sales & Application engineer.

The highlight of the event was the sharing of local and overseas working experiences by a project engineer who graduated from the same university. The participants learnt the success story of project implementation of a large HVAC project from design phase to the factory completion and occupation. The firm also provides internship programs for students during their semester break.

The talk was a success as the students benefitted tremendously from the experiences of the three distinguished speakers.

The student branch president, Mr.Choong Sze Weng presenting a token to Ir. Den Low after the talk.
