Report By: Mr. Chea Suei Keong
MASHRAE Rep: Mr. Chea Suei Keong and Tee Tone Vei
Partipants MASHRAE, MEADA, Manufacuterers
Report:

ST Kick-Off Meeting with representatives of manufacturing/importing companies and association representatives on 19 March 2025. ST explained in the meeting, the following are the advantages for manufacturing/importing companies that participate in the MEPS guideline development program for hot & cold water dispenser products;

1. A rebate by ST of at least RM1,000 for each company that sends samples to be tested at SIRIM
2. The test report issued during the testing can be used for the Certificate of Energy Efficiency (COE) application
3. The energy efficiency level for the samples sent during the testing will be included in the EE star rating table (at least 2 stars), unless the energy efficiency level for the sample is too far from other samples.

Therefore, to facilitate the process of distributing rebates fairly & to facilitate SIRIM to issue quotations, kindly fill in the product information to be sent to SIRIM for testing in the attached excel file template. A copy of the presentation slides is also attached for your reference.

Each company is requested to send at least two (2) models of hot & cold water dispenser. One (1) model for storage type & one (1) model for instantaneous type. Two (2) samples are required for each model.

Photos: Please submit the excel file containing the product information before or on 4 APRIL 2025.
